People often ask if the lake has "recovered," but this is a brand new lake now. The deposition of volcanic material and debris has researchers from the University of Washington, Tacoma have been working for 10 years to understand. Delve into the extensive research with Dr. Jim Gawel as he reveals what we know about the new lake today.

Presented by the Oregon Section this year, the Pauling Award is being awarded to Barry M. Trost.

Barry M. Trost, the Tamaki Professor of Humanities and Sciences at Stanford University, is the recipient of the 2015 Linus Pauling Medal. This annual award is given jointly by the ACS Portland, Puget Sound, and Oregon Sections in recognition of outstanding contributions to chemistry in the spirit of Linus Pauling, a native of the Pacific Northwest.

Trost is a pioneer in organic chemistry whose work on palladium-catalyzed substitution reactions blazed new pathways to complex molecules with applications in medicine and biology. Notably, the Tsuji-Trost reaction and the Trost ligand are named after him. Trost is also known for advancing the concept of atom economy and the use of transition metal-catalysts for orchestrating complex molecule formation in a chemically economical fashion.
