FALL 2019 ACS WORKSHOP
Developing Graduate Student Leadership Skills in Laboratory Safety
SUNDAY, AUGUST 25 • 3:00-6:00 PM

Laboratory safety teams (LSTs) have emerged in research-intensive science departments across the country as an effective way to improve the culture of safety. In addition, these programs empower graduate students to develop chemical safety leadership skills that will prove useful for future employment. This three-hour workshop will be led by three safety program experts from the University of Illinois at Urbana-Champaign, University of South Dakota, and University of Connecticut. It will describe current programs and research emphasizing the challenges and opportunities of safety culture in the academic environment. The purpose of this workshop is to help develop individualized plans for the creation or improvement of student safety programs. Other key topics include hazard assessment, risk management, safety management practices, and complementary top-down approaches. Participants will be awarded a certificate that can be noted on their resume.

This workshop is sponsored by the ACS Committee on Chemical Safety, ACS Safety Programs, and ACS Division of Chemical Health and Safety. Content is primarily directed at graduate student issues, but faculty and staff are encouraged to participate.
